SYSTEM REGISTRATION & FLUID TESTING

GETTING STARTED

Welcome to CORECHEM! We're glad to support you in taking a proactive approach to maintaining your hydronic HVAC/R system. Our Fluid Maintenance Program is a complimentary service that helps you monitor your system's fluid health and extend its performance over time—with no guesswork.

TO GET STARTED, FOLLOW THESE STEPS:

Step 1: Locate Your System ID

Your System ID Number is printed on the Annual Inspection Tag enclosed with this Starter Guide.

Step 2: Register Your System

Registering your system gives you access to:

- Expert fluid analysis
- Customized maintenance recommendations
- Complimentary fluid test kits

You can register in any of these three ways:

1. Scan the QR code shown to the right on this Starter Guide (NOT the one on the Annual Inspection Tag)
2. Text a photo of your Annual Inspection Tag to (865) 407-0653. Caption the photo "Register my HVAC system" and include a callback name and phone number.
3. Call us at (865) 524-4239 and ask to "Register my HVAC system for the Fluid Maintenance Program."

 **Step 3:** Attach the enclosed Annual Inspection Tag nearby the fluid sampling area of your hydronic HVAC/R system.

To request a fluid test:

Once your system is registered, you're eligible to order a free Fluid Test Kit. Scan the QR code on your Annual Inspection Tag. We recommend having your fluid tested 90 days after installation, and a minimum of annually thereafter.

Need Help?

We're here for you! If you have questions or want help registering, just give us a call at (865) 524-4239
